Introduction – Information – Mission of the Department

Continuous developments and changes in technology, science and human behavior form a complex and challenging global economic system, thus creating demand for trained scientists in the fields relevant to economics, who are required to receive the most updated knowledge. The Department of Economics of the Democritus University of Thrace responds to this challenge by teaching the relevant subjects and by its faculty scientific presence and research activity.

The mission of the Department is, based on the triptych Excellence-Science-Innovation in teaching and research, to create qualified scientists capable of contributing to the advancement of economic theory and its applications.

Curriculum

The Department's curriculum has been drawn up based on the needs University knowledge, academic ethics, didactic and pedagogical experience, the labor market needs and the international standards in the field of Economic and Management Science today. It focuses on the necessary scientific methodology and modern techniques required to deepen, conduct research and practice in Economy and Management.

Undergraduate degree – Courses Offered

The Department offers two basic directions of specialization so as graduates on the one hand can deepen in their areas of interest and on the other hand they can achieve their appropriate placement in the labor market worldwide, according to their skills and preferences. These directions are selected in the last two years of study and they are the **Economic Analysis** and the **Business Administration**.

Students are prepared using modern teaching procedures based on two pillars: The first is to deepen the knowledge of how the financial system operates and therefore monitor the development of economic theories and models. The second relates to stating "good" positions and proposals for achieving certain objectives regarding the more equitable and efficient organization of the economic system.

In this way, the Department's graduates can provide convincing evidence of their skills and knowledge in the labor market, they have the scientific potential to get involved in the cultivation and development of economic science and they can contribute to the advancement of economic theory and policy and its applications in:

- a) Public bodies and the wider public and private sector such as Ministries, Local Authorities, state and private financial institutions, financial advisors, banks, public enterprises and organizations, communication and media (television, radio, print media), publishing houses and in the wider economy sector as executives, consultants, trainers, etc.
- b) Accounting Offices, auditors' offices and general financial management bodies, economic research institutes in the public or private sector.
- c) Education, public and private, as members of the education system.

For more information please refer to the website http://pedis.uop.gr/?page_id=3860

Erasmus Program

The Department is actively involved acting as host and origin institution for foreign institutions incoming and its own outgoing students and teachers participating in the Erasmus mobility program. Under the Bilateral Agreements signed with foreign institutions, the Department students can move to study in any of these institutions for a period that may not be less than three months or more than one academic year. The program provides a grant to cover the costs they face and recognizes the study period at the foreign institution.

Research

The Department through its teaching and research staff has managed to be one of the most energetic and active research departments. In recent years it:

- Organizes or co-organizes international conferences with great impact
- Participates in numerous conferences presenting research papers
- Publishes high level research papers in international scientific journals and collective volumes with referees
- Publishes prestigious and high legibility academic text books
- Participates in several research projects with important collaborations in Greece and internationally.

Outreach and Engagement Activities

The Department's comparative advantage is its faculty, which are pioneers in the sector and with extensive experience in global best practices. Demonstrating deep understanding and appreciation, it has achieved an interconnection with the local community of Komotini and more generally Eastern Macedonia and Thrace. The local development issues and those arising from the geopolitical situation of the Region are part of a complex concern aiming at its promotion.
